

Figure S2. Circular representation of the ESM015 genome assembly, on the right, and the EP155 assembly, on the left. Yellow rectangles represent the telomeric regions. In grey on the second circle are the transposable elements. In red on the third circle are the genes of the ESM015 genome missing in the EP155 genome. In blue are the genes of the EP155 genome missing in the ESM015 genome.
